WORK EXPERIENCE

Senior Software Engineer

September 2025 – Present

Yoho Technologies Pvt. Ltd. | Chennai, Tamil Nadu, India

- Develop and maintain full stack web applications using React.js and the MERN stack across multiple live production projects
- Collaborate with the development team to design, implement, and test new features based on business requirements
- Integrate third-party services including AWS S3 for file storage and Mailjet for email and OTP workflows
- Participate in code reviews, debugging, and performance optimization to ensure high-quality, maintainable codebases
- Contribute to the development and regular maintenance of enterprise HR, recruitment, and operations platforms

KEY PROJECTS

Job Career Portal — Internal Recruitment Platform — MERN Stack, AWS S3, Mailjet

A full-cycle recruitment portal managing job postings, candidate applications, interview scheduling, and offer letter delivery.

- Contributed to building the MERN stack application covering job listings, candidate application flows, and interview process management
- Integrated AWS S3 for secure document uploads and Mailjet for automated candidate notifications
- Actively involved in regular maintenance and updates of the live production system

Employee User Portal — HR & Operations Management System — MERN Stack, AWS S3, Mailjet

A comprehensive internal HR portal covering the full employee lifecycle — from onboarding to exit documentation.

- Worked on multiple modules including document verification, onboarding, asset management, leave & permission management, ticketing, announcements, holiday calendar, task management, and appointment/experience letter generation
- Integrated AWS S3 for document storage and Mailjet for workflow notifications
- Actively involved in ongoing feature enhancements and maintenance in production

Company Blog Portal — React.js, MySQL, AWS S3

Official public-facing blog portal for the company website to manage and publish content.

- Developed dynamic blog features in React.js with MySQL for content management and AWS S3 for media storage
- Contributed to deployment and maintenance of the live production portal

3 Corporate Static Websites — React.js

Responsive marketing websites developed for three separate client companies.

- Built performance-optimized, fully responsive React.js websites for three distinct companies
- Handled development from UI implementation to deployment
